Source: Reuters. OTP Research

Summary

- BET slid marginally in the red, led by energy companies; BET-FI added 1.2%, strongly supported by SIF Oltenia (+3.9%), SIF Transilvania (+2.3%) and SIF Muntenia (+1.9%).
- The EUR/RON inched marginally lower yesterday, but appreciation potential is very limited
- The Treasury sold 7Y bonds at 3.88%, 25 bps lower than in mid-June and it tapped more than planned.

Another day with weak trading volumes went on: total equity turnover stood at EUR 4.2 mn. This time, the evolution of indexes was mixed. BET and BETPlus slid marginally in the negative mostly driven by the energy company components: OMV Petrom and Romgaz. BET-NG, which represents companies in this industry had the lowest performance yesterday while BET-FI added 1.2%, strongly supported by SIF Oltenia (+3.9%), SIF Transilvania (+2.3%) and SIF Muntenia (+1.9%). In Europe, major stock indexes finished in the red and tension remains high due to the Ukrainian – Russian conflict.

The EUR/RON pair moved a tad lower yesterday but appreciation potential is very limited considering the expected path of monetary policy and also the positioning of non-resident bond investors in the immediate future.

Yields up to 5Y continued to climb marginally. The Treasury sold more than the planned amount in bonds with residual maturity of 6.9Y at an average accepted yield of 3.88%. It was 25 bps lower than the one at the similar tender in mid June. Last time when the Treasury bought more than planned was in early June but since then money market rates continued to fall and no immediate risk was present. Now, we are seeing a slightly higher risk aversion as the 5Y CDS (euro) climbed 3bps to 122 bps.
